SKILLS

JavaScript, React / Redux, HTML5 / CSS3, Express, PostgreSQL, Sequelize, Python, Flask, SQL, SQLAlchemy, Docker, Node.js, Git

PROJECTS

The Net Archives | *(React / Redux, Javascript, Express. HTML5 / CSS3 PostgreSQL, Sequelize)*   **live** | **github**
- Created user privacy through authentication handling in both the frontend and backend, only allowing users to access, edit and add their own reviews and shelves when logged in.
- Used Redux for state management to implement a joins table in order to implement a many-to-many relationship from the database to the front end..
- Implemented custom search with Redux witha query string sent to the API, in order to manage inputted data and to allow users to search for specific media based on title.
- Utilized Express with RESTful routes to manage backend endpoints, and to retrieve information from the backend database.

SeedStarter | *(React / Redux, Python, Flask, SQLAlchemy, HTML5 / CSS3)*   **live**| **github**
- Implemented dynamic form modals that were styled in CSS3.
- Applied AWS S3 so users can upload photos, storing data as URLs in order to reduce database load times and support scaling.
- Designed a Flask API to create RESTful routes that uses SQLAlchemy to query information and display the information to the user using React.

Yarn Notes | *(React / Redux, Javascript, Express. HTML5 / CSS3, PostgreSQL, Sequelize)*   **live** | **github**
- Ensured user privacy through authentication handling in both the frontend and backend, only allowing users to access, edit and add their own reviews and shelves when logged in via JSON Web Token and PassportJS.
- Utilized Redux for state management, to simplify components, and manage data for form inputs and submission. Designed dynamic components that were then styled with CSS3.
- Used Express with RESTful routes to manage backend endpoints, and to retrieve information from the backend database.

EXPERIENCE

Property Damage Adjuster
Plymouth Rock Assurance Company   Jan 2019 - Sep 2020
- Applied knowledge of automotive insurance coverages, commonly used insurance concepts and practices.
- Interacted with customers via telephone and email to discuss the claims process in a fast-paced, high stress environment, and resolve any issues that may arise in a timely manner.
- Communicated internally and externally, reviewed provided documentation to investigate and determine liability.

Floor Staff
Regal Entertainment Group   Jul 2016 - Mar 2019
- Responsible for opening and/or closing the workplace including cashing out day's receipts and ensuring the site is prepped for next day's business.
- Other duties as team member included box office ticket sales, concession stand sales and re-stocking, food preparation and janitorial tasks as needed.
- Responded to customer concerns and resolved inquiries or complaints.

EDUCATION

Massachusetts College of Art and Design - *Bachelor of Fine Arts, Sep 2014 - May 2018*
AppAcademy - Software Engineering Bootcamp May 2021 - Jan 2022
